

Press coverage: Sore eyes as the most significant ocular symptom experienced by people with COVID-19

Pardhan, S., Vaughan, M., Zhang, J., Smith, L. and Chichger, H., 2020. Sore eyes as the most significant ocular symptom experienced by people with COVID-19: A comparison between pre-COVID-19 and during COVID-19 states. *BMJ Open Ophthalmology*, 5 (1). doi: [10.1136/bmjophth-2020-000632](https://doi.org/10.1136/bmjophth-2020-000632).

Professor Pardhan's article showed that in people with a positive COVID-19 diagnosis, the three most common new symptoms experienced by participants were photophobia (18%), sore eyes (16%) and itchy eyes (17%).

The article has received an [Altmetric score](#) of 596 and is in the top 5% of all research outputs scored by Altmetric.

Media coverage of the article can be seen in the following table. Stories were published in over 100 media outlets with a total monthly reach of over 347 million visits.
